

Job Vacancy

Are you interested in the risk management of critical infrastructures? Would you like to get new insights in the consequences of the transformation of the energy system or the climate change? Are you interested in application oriented research and teaching?

The group on Risk management at the Institute for Industrial Production (IIP) has several vacant positions as

Student research assistants (wissenschaftliche Hilfskräfte)

The work involves the support and assistance of current research projects and teaching activities in the areas of risk management and decision support for critical infrastructure disruptions. An interest in risk management, decision support and background knowledge in the field of critical infrastructures (e.g., IT, transportation, or energy systems) is advantageous.

Prerequisites are

- A good command of the English and German language
- Experience with MS Office
- Good communication skills
- Enrolment as a student at KIT
- Modelling and programming skills are beneficial

A long-term availability would be preferable. Dedication and the ability to work independently are preconditions.

Working hours are flexible and the contract is expected to be for at least 32 hours/month.

Please send an electronic application in English, including motivation, CV and certificates, to Dr. Tina Comes (comes@kit.edu).
